**The Introduction ; Being a Dialogue between the Eagle, the Fox, and  
the Ape about the Wolf's Estate.**

**T**HE Eagle and the Fox did once agree  
To nestle both and harbour in one Tree.  
So to the VVood they went, and having found  
A pleasant Tree on a fair Spot of Ground.  
VVell, says the Fox, My Friend, this is the Place  
VVhere we may build and raise a Noble Race.  
Thus, having found the Place, they next agreed  
How they may build their Nests wherein to breed.  
(I) says the Eagle, love to mount on high ;  
And I (says Reynard) on the Ground will lye:  
Thou on the Lusty Boughs thy Dwelling have,  
And I below will make a Noble Cave.  
So having both agreed, to work they went  
To build their Palaces with one Consent.  
Reynard below did raise a treach'rous Breed,  
The Kingly Bird above his Young did seed.  
But on a sudden struck with Panick Fear,  
Said, Good Sir Fox, who is our Landlord here?  
Alas, said Reynard, Noble Bird, ne'er doubt,  
'Tis a Noble Kinsman's dwelling hereabout,  
A Wolf of noble Blood, but weak and thin,  
No Child he's got; and we are nearest Kin ;  
And when he's dead we'll seize this Noble Plain,  
Then all Resistance 'gainst us will be vain.  
Thus having said, and having Footing got,  
Old cunning Reynard then begins to plot  
How he may seize on All immediately.  
So soon as News was brought the Wolf shou'd dye,  
Then on a Learned Ape standing at hand  
The Old Fox instantly lays his Command  
To summons other Apes of Learning too  
For to consult what were the best to do.  
The Apes being come, one graver than the rest,  
Said, Noble Sir, 'tis ready in my Breast:  
The Royal Wolf now dying, I have Skill  
And presently will forge his Honour's Will,  
Wherein, tho' he knew nothing, shall declare  
One of your young Cubbs his apparent Heir.  
Then when it's sign'd and seal'd we'll give it you,  
And all the Apes 'ith' VVood shall swear 'tis true,  
Then Reynard laughing hearty at the jest,  
His Voice was heard up to the Eagle's Nest,  
VVho soon perceiv'd his Craft, and understood  
His Tricks, craves Help from all the Birds 'ith' Wood,  
VVho quickly all flew in unto his Aid,  
And one more wilely than the rest, thus said,  
If this go on, we must expect to fall:  
For he'll find Cubbs enough to heir, us all.  
No, he shall down: There's no way for Escapes ;  
We'll drive him from his Land, and whip his Anes

## *The Use and Explanation of the Almanack.*

ON the Left hand Page there are eight Columns; The first shews the Days of the Month, the second the Days of the Week, the third shews the Fast and Festival Days used in the Church of *England*, as also the Rising, Setting, and Southing of the 7 Stars, and other noted fixed Stars; the fourth shews the Sun's Place; the fifth the Moon's Dominion over the Body of Man; the sixth shews the Moon's Age to every Day of the Month, which answers to the Moon's Age in the Tide-Table, and is the most easie and readiest way to find the time of High-Water at all those Ports and Places found in the Table; the seventh Column shews the time of the Moon's rising and setting in Hours and Minutes; from the Change to the Full you have the time of her setting in Hours and Minutes; and from the Full to the Change you have her Rising also in Hours and Minutes, A. standing for Afternoon, and M. for Morning. *Example*: Suppose you would know when the Moon sets on the 11th day of *January* this Year, over against which Day in the Column of the Moon's Rising and Setting you have 10 21, which shews the Moon sets at 10, and 21 Minutes past in the Afternoon, denoted by A standing over it: And so of the rest: The last Column of this Page shews the mutual Aspects of the Planets and the Weather.

The Right-hand Page hath five Columns; the first shews the Day of the Month, according to the *English* account; the second by the *Roman* Account; the third the Rising and the fourth the Setting of the Sun; (thus:) In *January* 13. the Sun rises at 7 a clock, and 46 minutes past; and sets at 4, and 14 past; and so of the rest: the fifth and last Column shews the Fulls, Changes and Quarters of the Moon, with Astrological Observations on every Month.

# January hath xxxi Days.

Give ear, ye Gallick Slaves, and I'll declare  
Your future State, and shew what Slaves you are.  
Give ear again, and tremble at the Name  
Of Glorious ANNE, Great-Britain's noble Dame.  
'Tis in her Reign, the time is even now,  
The lofty Tyrant does begin to bow.

The Use of this Table.

Suppose a Man owes 500 l. to be paid at 3 Months end, what must he reba-  
re receive it presently? Look in the Table for 500 in the side; then cast your  
along till you come under 3 Months; in which Column you will find 7 l.  
d. which is to be discounted out of 500 l. and so of the rest.

*Of the Eclipses this present Year 1703.*

**S**IX times this Year will the Inhabitants of this terrene Star be depriv'd of the Luminarian Lights, viz. four times that glorious Lamp of Heaven the Sun, and twice the lesser Luminary the Moon, will be eclips'd from their Sight.

The First of which will be an invisible Eclipse of the Sun on *January* the 6th, near 11 of the clock before Noon, and tho' at the same time the Sun be so near the Meridian, yet will not be seen by any that inhabit these Parts; but to those who inhabit the Southern Africa, &c. it may be seen if the Air be clear. This Eclipse happens in about 27 Degrees of *Capricornus* or the Celestial Goat, and may in some measure make those Countries or Cities subject to that Sign sensible of its Effects. Let Saxony beware, &c.

The Second is a total and visible Eclipse of the Moon on the 17th day of *June*; it happens in about 6 Degrees of *Capricornus* also, at which time about 20 Degrees of *Taurus* ascends the Horoscope, and 22 Degrees of *Capricorn* upon the Mid-Heaven. *Saturn* and *Jupiter* are located in the 12th, and so they were likewise at the time of the Eclipse of the Sun in *January* last; as also at the time of the Conjunction in *May* last Year. This is very remarkable and I fear will bring Trouble and Calamity to many, especially to those inhabiting those Places Subject to that Sign or have it ascending at their Birth. This Eclipse happens in the first Face of that Sign, and as Authors say, shew Suggestions amongst Men, and untimely Death or mischief to some Great Illustrious and Noble Man. The beginning of this Eclipse is at 34 min. past 11 at Night. The beginning of total Darkness is at 36 min. past 12. The middle or greatest Obscuration is 14 min. past 1. next morning. The end of total Darkness is 52 min. past 1. The end of the Eclipse, 54 min. past 2. Total Duration 3 hours 2 min. Continuance of total Darkness 1 hour 15 min. Dig-

clips'd 15, and 55 minutes, which is near 4 Digits more than the Moon's Body contains.

The *Third* is of the *Sun* on *July 3.* near three of the clock in the morning. It is celebrated in about 21 Degrees of the Tropical Sign *Cancer*, but will not appear visible to us of this Island.

The *Fourth* is of the *Sun* also on the 27th day of *November*; but the *Sun* will be set before the Eclipse begins, whatsoever some may think to the contrary, and therefore will consequently be invisible to us also. It happens in about 16 deg. of *Sagittarius*, and may, if the Air be clear, be seen by those that inhabit *New-France*, and in the *Atlantick Ocean*.

The *Fifth* is a total and near Central Eclipse of the *Moon* on the 12th day of *December* in the morning.

digits eclipsed 20, and 5 minutes, which is 8 parts of 12 more than the *Moon's* Body contains. This Eclipse ends 1 min. past 8 in the morn. about which time the *Moon* is in *Cancer*, and it happens in the very Beginning of *Cancer*, at which time the *Moon* is beheld by a hateful Square of *Sagittarius*; and those Places subject to that Sign as well as People, may in time be made sensible of its Effects. It excites and brings up Wars, Commotions, &c. and this brings me to the end, which is

The *Sixth* and Last, and is of the *Sun* on *December 27.* about 3 of the clock in the morning. This Eclipse is celebrated in 16 degrees of the Celestial Goat. It will be but a small Eclipse, and invisible: Therefore I shall mention no more of it; and so much for the Eclipses this Year: which brings me to consider in the next place the *Sun's* Entrance into the four Cardinal Signs or Quarterly Ingresses, which is as followeth: First,

## The Winter-Quarter

Takes its Beginning at such time as the glorious Lamp of Heaven the Sun takes possession of the Celestial Goat, and mounts the first Point of the Sign Capricorn, which happens on December 11, 1702, at 22' past 5 in the morning, according to Mr. John Wing's Tables in his *Scientia Stellarum*; but according to Street's Tables, 9 minutes later; at which time, according to the former, 26 degrees of *Scorpio* ascend the Horoscope, and 19 of *Virgo* on the Cusp of the *Medium Caeli*; the Sun is near a square of *Saturn* and *Jupiter*, the both posited in the fourth, and the Sun in the second lot red. The Affairs of this Quarter seem to be various; many fly and secret Councils and Contrivances by wicked Men, as well as great Councils by those in Authority whose Endeavours God direct and prosper for the Good of these Kingdoms; and may the Church of England in particular, and the Protestant Religion in general flourish while the Sun and Moon endure; and may the Enemies thereof, and the Disturber of Europe be put to shame; it came to pass (when that wicked King) Jeroboam heard the saying of the Man of God which he had cried against his Altar in Bethel, that he put forth his hand from the Altar saying Lay hold on him, and his hand which he put forth against him dry'd up, so that he could not pull it in again. If so, we must he expect that has been the great Troubler of Israel he has not only put forth his Hand, but has slain many Ministers of the Lord, and other good Men and Women whose Blood undoubtedly cry for Vengeance, and in a good time will certainly be reveng'd; which brings me to the next place to consider the Affairs of the

## Spring-Quarter,

Which commenceth at such time as bright Sol mounts the first Point of the Celestial Ram, or Sign Aries, which happens this Year on March 10, at 27' 25" past 7 o'clock in the morning, by Mr. Wing's Tables in *Scientia Stellarum*; but by Mr. Street's, at 3' and 20" past 7 in

## Astrological Observations for 1703.

morning; but I shall stick to the former, approving them as the best; by which you may observe 17 degrees of *Taurus* Ascend. 20 degrees of *Capricornus* culminate, and 20 degrees of *Cancer* on the *Inum Cæli*. *Saturn*, *Jupiter*, the *Sun*, *Venus*, and *Mercury*, are all in *Aries*, located in the 12th House, the Moon in the 12th behind the Cusp of the Ascendant, and *Mars* the Patron of *VVar* posited in the Horoscope in *Taurus* the Ascendant of *Ireland*; so that all the seven are crowded near together in the Eastern Parts of Heaven, and all except *Mars* in the House of Trouble, Vexation and Imprisonment. *Mars* is in Opposition to his own House; and if a certain Prince that has the middle of *Scorpio* ascending in his Nativity, remain yet among the Living, he must expect Trouble and Affliction to purpose; for there is a God that will revenge the Cause of his People. VVhen *Pharaoh* had plagued *Israel*, then God also plagued him; but when the People forgot their Deliverer, and rebell'd against him, he did destroy them in the VVilderness. This is like to be a very active Spring; and the Conjunction of *Saturn* and *Jupiter* now begins to operate to purpose; great Preparations made for the Actions of the approaching Summer, Soldiers moving from one Place to another, in order to appear in the Field; and those Places more Eastward from *England* will be greatly concern'd: if the Northern Crowns agree, then let the *Gallick* Tyrant beware: *Italy* is very uneasie, and the whole Conclave of Cardinals at their VVits Ends. VVoe to the shaven Order, and a double VVoe to the Jesuitical Crew, those Curroar Villains that term themselves of the Society of the blessed *Jesus*. This Society was instituted by *St. Ignatius Loyola* a Spaniard, and confirmed on the 26th of September Anno 1540, by Pope *Paul* the Fourth. They vow'd to Poverty, Obedience, and Chastity; as for Poverty, they will never be poor as long as the Laity have any thing left; as for Obedience (that they observe) if the Command be to stir up their Disciples to cut the Throats of *Protestants*: and as for their Chastity, all the VVorld is sensible of that Vertue.

8 *Astrological Observations for 1703.*

(But if there be any that are not) the way to prove it is to send their Daughters to the Nunneries, where they will soon be made sensible of it; but the best way to keep them chaste, will be to geld them before they receive Orders. The Popish Crew in general have bore sway in Europe a long time. We in England have tasted of their Kindness, and poor Ireland suffered with a witness; but the time is coming when Babylon must down, and head the VWorld no more: And the ten Horns which thou sawest upon the Beast, are they that shall hate the Whore, and shall make her desolate and naked, and shall eat her Flesh, and burn her with Fire; for God shall put into their hearts to fulfil his Will, and to do with one consent, for to give their Kingdoms unto the Beast until the Word of God be fulfilled; and that Woman which thou sawest, is the great City which reigned over the Kings of the Earth, Revel 17. v. 16, 17, and 18.

The ten Horns are ten Kings, as in Verse 12. (and as it is in the Margent of our Bible.) This Act is daily increased in our Age by the singular Providence of God, and his most mighty Government; wherefore the Facts are propounded in the 16th Verse, and the Causes of them in the Verses following. In the 17th Verse is a Reason rendered from the chief efficient Cause, which is the Providence of God, by which alone St. John by Inversion of Order affirmeth to have come to pass, both that the Kings should execute upon the Harlot that which pleased God; and also that by one Consent and Council they should give their Kingdom unto the Beast, &c. For, as the being blinded, have before depended upon the Beck of the Beast that lifteth up the Harlot, so it is said that afterwards it shall come to pass, that they shall turn back, and shall fly away from her, when their Hearts shall be turned into a better State by the Grace and Mercy of God. The VVoman in the last Verse (the Margent Notes express it) to *Rem* that great City, or only City (as *Justinian* calleth it) The King or Head thereof was then the Emperor, but now the Pope: Since that the Condition of the Beast is changed; And this brings me to the Remembrance of some

## Prophecies and Predictions.

Prophecies and Predictions of eminent Men, which I have inserted as follows.

And first, I shall begin with that of the Archbishop of Ravenna, a City of Italy, who speaks of a great Prince by the Name of a Lion: Wo, says he, to the City of Philosophers! VVo unto thee Lombardy (that is, a People inhabiting the hither Parts of Italy, much addicted to Usury) thy Towers of Joy shall be broken down; all the Tyrants shall be put out of God's Church, and there shall be made a general Conversion to the Faith of Christ by the great Lion. — And further (saith he) the Lion shall convert other Nations.

Again, Sybilla Erithzea in an Imperial Manuscript, hath thus prophesie: 'That the Lion-Monarch shall be made famous unto all, and shall subvert Kingdoms, People and Nations.

In the next place observe the Saying or Prophecy of Fryer Vincent, he being one of the Order of the Dominicans, which Order was instituted by one Dominick a Spaniard, about the Year of our Lord one thousand two hundred and six.

This Holy Fryer tells us, 'That there shall be three Armies that shall come from the West, East and North, and fight together in Italy; and that the Eagle shall take the counterfeit King, and all things shall be made obedient to him; and that there shall be a new Reformation in the World. VVo then, says he, to the (shaven Orders). He might as well have put in the Cardinals, Jesuites, &c. as the Fryers and Monks only. — Now one Cyrila Monk, will have that an Emperour; ay, and an Emperor of Germany too, that is to putt down, destroy and confound the Nests of the Monks, and all the rest of the sanctify'd Crew, and do so much harm to Rome. I hope it may come to pass. God preserve the Arms of the Emperor and his Allies, to perform this great and mighty Work,

*That Mift'ry Babylon, that Scarlet Whore,  
May shortly down and head the VWorld no more.*

In the next Place observe the Prophecy or Saying of Abbot *Joakim*, who in his Day was look'd upon to be a very Religious Saint of that Church.

He tells us, *That when the Thorns and Brambles are root-  
ed out, that a holy Man shall pacifie the Eagle,*

Again *Michael Nostradamus* of St. Remy in France, Physician to the then French King, he was a great Mathematician and Astrologer, who dy'd July 2. 1566, in his 81<sup>st</sup> Century and 99<sup>th</sup> Quadrin, &c. says, 'That three Temp-  
'ral Princes shall translate the Popedom elsewhere. And *Gamaleo* and others tell us, that *Mentx* shall be the Place to which it shall be translated. And to this he further adds, 'That an Eagle shall appear from the most high Rocks of Germany, accompany'd with many fierce Griffons, and shall extend his Forces Eastward; and that he shall also make the Pope to leave Rome, and shall bring Confusion to all Italy. Certain it is, that *The joy of the wicked shall be but for a moment.*

Some have writ, That the thousand Years mention'd in the 20<sup>th</sup> Chapter of the Revelations, began in the Year 1694, and shall end in the Year 2694; during which time *Satan* shall be bound; but afterwards being let loose for a small time, he shall stir up *Gog* and *Magog*, (that is the protest Enemies of Christ and his Church) against the Saints, but shall be suddenly overcome; and then our Lord Christ shall come in Glory to put an end to this World. Come, he certainly will; And as sure as the World had a Beginning, it shall as sure and certainly have an End: But that Day and Hour knoweth no Man.

And to this I think it very proper to add this Prophecy, or Description of the End of the World following which is very remarkable, deliver'd many hundred Years

since in Greek Acrostick Verses; the initial Letters making up these Words :

JESU CHRIST, SON OF GOD, THE SAVIOUR.

It was deliver'd by Sibylla Erythrea, and recited by St. Augustine in the fourth Book, and twenty third Chapter of his Treatise *De Civitate Dei*; which I shall here give you in the Words of him who many Years since translated that excellent Book into English, as followeth.

In Sign of Doomsday the whole Earth shall sweat,  
Ever to reign a King in Heav'nly Seat  
Shall come, to judge all Flesh: The Faithful and  
Unfaithful too, before this God shall stand.

Corporal shall be fit, and thence extend  
His Doom on Souls. The Earth shall quite lie waste,  
Ruin'd, o'er-grown with Thorns; and Men shall cast  
Idols away, and Treasure. Searching Fire  
Shall burn the Ground, and rage with fatal Ire  
Through Seas and Skies, and break Hell's blackest Gate.

So shall free Light salute the blessed State  
Of Saints: The guilty lasting Flames shall burn:  
No Act so hid, but thence to light shall turn;  
Nor Breast so close, but God shall open wide.  
Each where shall Cries be heard, and Noise betide

Of gnashing Teeth: The Sun shall from the Sky  
Fly forth; and Stars no more move orderly.

Great Heav'n shall be dissolv'd; the Moon depriv'd  
Of all her Light: Places at Height arriv'd,  
Depress'd; and Vallies mounted to their Seat.

There shall be nought to Mortals high or great:  
Hills shall be levell'd with the Plains; the Sea  
Endure no Burthen; and the Earth as they.

Shall

Shall perish, cleft with Lightning; every Spring

And River burn: The fatal Trump shall bring

Unto the World from Heav'n a dismal Blast,

Including Plagues to come for ill Deeds past.

Old Chaos through the scatter'd Mass appears:

Unto the Bar all Kings come Prisoners:

Rivers of flaming Brimstone, drown their Tears.

Thus having done with Prophecies at present, I come next to consider the Summer Quarter, or the Sun's Entrance into *Cancer* (or the Celestial Crab) which happens this Year on Friday the 11th of June at 53 Minutes and 27 Seconds past 7 in the Morning, by *Scientia Stellarum*; but by *Astronomia Carolina*, at 8 Minutes, 42 Seconds past 8: By the former seventeen Degrees of *Leo* ascends the *Horoscope*; and the latter End of *Aries*, on the Cusp of the Mid-heaven. *Saturn* is in the 9th near the Cusp of the 10th, in exact Square to *Mars*, and but newly separated from the Square of *Mercury*. *Mars* is in the 11th, near the Cusp of the 12th. I hope no Quarrel about Religion among Protestants.-- (What are the Scots uneasy) or the Dutch troubl'd with a Fit of Grumbling. *Mars* is in *Cancer*, and *Saturn* in *Aries*. Pray God keep all quiet. Quarrels and Duels, with Murders of all sorts from divers Parts, we may expect to hear of; and fear many Self-murders too in this Quarter. The late Square of *Saturn* and *Mercury* shews some Villany in hand it may be some scandalous Pamphlet or other dispers'd against the Government, or some other Roguish Exploit for which I hope the Actors will meet with a Reward suitable to their Merit. Soon after the Ingress *Jupiter* squares *Venus*, and some notable Dame must expect to meet with Sorrow and Affliction, if not Death. Armies are now preparing for the Field; and the Affairs of War go on vigorously. God grant Prosperity to all the Confederates, and send them Victory over the Disturber of Europe. The Diseases of this Quarter will chiefly be such as happen to the Knees; as Gout, Strains, Fractures, Scabs; as also Distillation of Rheum and Melancholy.

12

choly, Vapours in the Head, Obstructions, Pains in the  
Teeth and Ears, caus'd by Cold taken at the Head:  
which brings me to the next, which is the *Autumnal Quar-*  
*ter*, and takes its Beginning at such time as

The bright Lamp of Heaven touches the first Point of  
the Sign *Libra*, or the *Celestial Balance*, making the Days  
and Nights again at equal Length, as in *March*, which  
happens this Year on *Sunday* the 12th of *September*, at 59  
Minutes and 31 Seconds past 8 at Night, by Mr. *Wing's*  
Tables; but by Mr. *Street's* not till 50 Minutes and 11  
Seconds past 9. I follow the former, and have 18 Degr.  
of *Gemini* ascending, and 10 Degrees of *Aquaries* on the  
*Medium Cœli*. *Mercury* is, hasting to an Opposition of *Sa-*  
*turn*, and *Venus* to the same of *Jupiter*; and the next  
Month *Saturn* opposes both the *Sun* and *Mars*; and *Jupiter*  
opposes both the *Sun* and *Mercury*: so that I see but little  
hopes of Peace abroad — Therefore let us pray God to  
keep us in Peace at home, and pray for the long Life of  
our gracious Queen *ANNE*. The Diseases of this Quarter  
are such as affect the Reins and Kidneys; as Stone, Gravel,  
Heat and Ulcers in the Reins or Loins, Weakness of the  
Back, Scurvy, King's-Evil, Pain in the privy Parts, and  
the Grand-P-*x* too, if you have not a car; for *Venus* is  
lady of the 6th, and located there in *Scorpio*: And thus  
I shall end this Quarter with what follows, written by that  
poet Mr. *Abraham Cowley*.

*Claudian's Old Man of Verona, compar'd with an ho-*  
*nest, harmless, contented, Country Life, &c.*

I Appy the Man, who his whole time doth bound  
Within the Inclosure of his little Ground;  
I Appy the Man, whom the same humble Place  
(his hereditary Cottage of his Race)  
From his first rising Infancy has known,  
And by degrees sees gently bending down,

*With*

With natural Propensions to that Earth  
 Which both preserv'd his Life and gave him Birth,  
 Him no false distant Lights by Fortune set,  
 Could ever into foolish Wandrings get.  
 He never Dangers either saw or fear'd;  
 The dreadful Storms at Sea he never heard.  
 He never heard the shrill Alarm of War,  
 Or the worse Noises of the Lawyers Bar.  
 No Change of Consuls mark to him the Year:  
 The Change of Seasons is his Calendar.  
 The Cold and Heat, Winter and Summer shows;  
 Autumn by Fruits, and Spring by Flow'rs he knows.  
 He measures time by Land marks, and has found  
 For the whole Day the Dial on his Ground.  
 A Neighbour Wood born with himself he sees,  
 And loves his old contemporary Trees:  
 Has only heard of near \*Verona's Name,  
 And knows it, like the Indies, but by Fame:  
 Does with a like Concernment notice take  
 Of the Red Sea, and of †Benacus Lake.  
 Thus Health and Strength he to a third Age enjoys,  
 And sees a long Posterity of Boys.  
 About the spacious World let others roam

### The Conclusion.

According to my Promise, you may see,  
 I've pourtray'd seventeen Hundred and Three  
 Beforehand, as 'tis after like to fall,  
 If God permits, who rules and governs all.  
 Sin hinders Good; but Grace preventeth Ill:  
 Stars but incline; all's as Jehovah will.  
 And he that can but read the Stars above,  
 May see much of God's Wisdom and his Love,  
 Strange things to come; But if I've ought forgot,  
 Arts long, Time short, Pains great; then blame me not.

For in all things that we see here below,  
No absolute Perfection can we know.

\* \* (But hold) the time's at hand: Go wander then;  
The Press just now has overtook my Pen.

Make no Excuse; abroad now thou must go,  
Poor little Book! Thy Fate will have it so!

Thy Steed is ready: [It's the grave Pedlars Back,]

Thy Harbinger (his Dog,) thy Inn (his Pack.)

But yet I pity thee; because alas,

The Way is rough, I know, that thou must pass.

There's one will think thee rash, another Spy,

And look thee over twice before he'll buy.

Well; take good Wares from one, another's scorns;

A Wilderness is not without some Thorns.—

(Nay, I) as well as thee, endure the Rack,

When such a Din's made for Moor's Almanack.

It makes me blush a little, when I meet

My Name, like Makarel, cry'd about the Street.

But I thereon will set the bolder Face;

Because such Fortune have great Acts of Grace.

Well-pleased or displeased, I'll appear

Servant or Slave, to serve you once a Year.

Then let it pass; and when this Journey's over,

I'll see if better Luck I can discover;

And shall end this Year with God preserve our most gracious  
Sovereign Lady Queen ANNE, and grant her a long and  
prosperous Reign here on Earth, and eternal Happiness  
in Heaven hereafter; and also grant that the Protestant Re-  
ligion may flourish in these Kingdoms as long as the Sun and  
Moon shall endure, is the humble Prayer of,
